

## WHITEPAPER – RALLY (\$RLY)

The First Solana Platform Where You Predict How Many X's a New Coin Will Reach on Its First Day or Week of launch

---

### 1. Introduction

Rally (\$RLY) is a utility token powering the first platform where users predict how many X's a newly launched coin will reach on its first day or week after launch — a process called Rallying.

Users compete by making predictions, winners share rewards, and coin creators benefit too.

Rally is designed to eliminate rug pull risks, provide early insight into new tokens, and help users make smarter, lower-risk decisions in crypto.

---

### 2. How Rally Works

- Users Rally on a new token — Before a coin launches, users predict how many X's the token will reach during its first day or week. (e.g., 2x–3x, 4x–5x, etc.)
  - Compete and Earn — Those who predict correctly win a share of the prize pool.
    - Pool Distribution:
      - 80% to winners (shared proportionally)
      - 10% to the coin creator
      - 5% to the Rally platform owners
    - Referrals Matter — Top 10 referrers for each Rally share 5% of the pool.
  - Instant Cashouts — Winners can withdraw immediately.
- 

### 3. Closest Rally Wins

If no one predicts the exact X range a coin reaches in its first day or week, the closest lower predictions win.

- Example: If a coin hits 7x, and you predicted 4x–5x, you are closer than someone who picked 8x–9x.
  - Every Rally round will have winners — someone always earns.
-

#### 4. Ensuring Fair Gameplay

- Dynamic odds reward less popular predictions with higher payouts.
- Users can only select two X ranges per Rally.
- Unlimited Rallying is restricted — real risk, real rewards.

Payout Example:

- Total Rally Amount: \$100,000
- Amount Rallied by winners: \$9,000
- Winning Ratio:  $80,000 \div 9,000 = 8.88$
- If you Rallied \$200  $\rightarrow \$200 \times 8.88 = \$1,776$  payout.

---

#### 5. Secondary Use Cases

1. Launchpad for New Coins:
  - Anyone can create a Rally for a new token.
  - Coin owners earn 10% of Rally fees generated on their token.
2. Submit Your Own Coin Ideas:
  - Users who Rally get the chance to submit token ideas.
  - Top 2 ideas weekly are turned into real tokens by the platform.
  - Idea creators earn 5% of Rally fees and 20% of the new token supply.
3. Referral Program:
  - Top 10 overall platform referrers share 10% of Rally's total revenue.

---

#### 6. Tokenomics

Total Supply      300M \$RLY  
Launch Price      \$0.005  
Circulating at Launch   30M  
Locked Supply    270M (locked for 1 year)  
Liquidity      Locked for 1 year  
Burn   20M over time (boosting scarcity)  
Market Cap at Launch   \$150K  
Sell Tax      4% (No Buy Tax)

---

---

## 7. Security & Anti-Scam Measures

- Liquidity Locked — Prevents rug pulls.
- Audited Smart Contract — Verified by a reputable firm.
- Anti-Whale Protection — Ensures fair token distribution.
- Real-Time Tracking — Transactions viewable on Solscan and Solana Explorer.
- KYC for New Listings — Ensures only legitimate projects are listed.

---

## 8. Roadmap

### Phase 1: Pre-Launch

- Mint \$RLY Token (300M Total Supply)
- Lock for 12 Months
- Whitepaper & Website Release
- Community Building

### Phase 2: Launch & Growth

- Token Launch on Solana
- Listings on DexTools, BirdEye, DexScreener, CoinGecko, CoinMarketCap
- Influencer Marketing & Twitter Ads
- Beta Testing of Rally Platform

### Phase 3: Full Platform Launch

- Full Rally Platform Live (Predict How Many X's Tokens Reach)
- Launch Coin Creation for Top Ideas
- Expand Referral and Reward Systems
- Community Governance and Voting

### Phase 4: Scaling & Mass Adoption

- More Platform Features
- Major CEX Listings
- Additional Token Burns
